

RFP#17-021-30 – Trailer Mounted Attenuator
Addendum #2, posted March 31, 2017

Question #1: The specification clearly states Scorpion Model TL-3 or **Approved Equal**. However, there is a discrepancy in providing an approved equal with the way the specification is written. Please refer to item #6 on the Tabulation Sheet **“Overall Length not to exceed 18 feet”**. This particular specification excludes all other Trailer Mounted Attenuators in the market. Therefore, there can’t be an approved equal unless it is a Scorpion model. Can you please note a provision to this bid to allow all Trailer Mounted Attenuators that meet NCHRP TL-3 standards.

Answer: No, the specifications will not be changed regarding this information
